design

Design: The Rendering of Intent

What was Dustin Curtis's intention?

Context:

It's where design happens.

Intentions and
execution

Everybody thinks they are a designer.

To make this new boarding pass, Delta must:

Replace 10,000+ boarding pass printers.

Change paper size and add cutting for bleeds.

Create new supply chain for colored inks.

Which design is more 'perfect?'

What causes poor design?

The **right** intention; rendered **poorly**?

or

A **poor** intention; rendered **right**?

To improve design,
we must work on both
the intention and
the skills of rendering.

3 Are we designing Activities or Experiences?

Joanna8555 (Flickr)

Six Flags = Activities

Disney = Experience

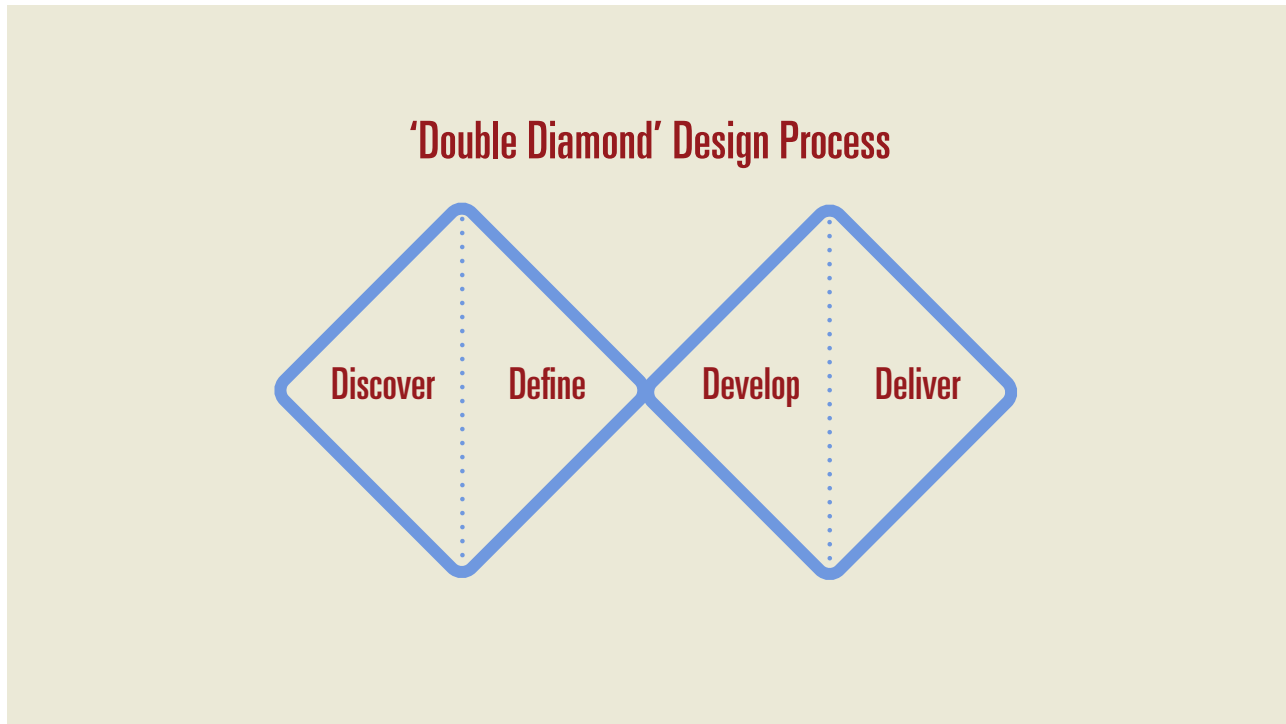

A design process is
a designed experience.

4

Creating a
design process
for our
design processes

Design Process:

"I'm pissed off and I'm gonna show you how to do it right."

An intentionally designed design process answers these questions:

Who is on the design team?

How will they add value?

When will they need support?

An intentionally designed design process answers these questions:

How do we introduce the design process?

Who will get credit for any successes?

Who will take the blame for any failures?

The most effective design teams worship inclusiveness.

5

Changing the behavior of others... with our thoughts

The effects of experimenter bias on the albino rat.

Rosenthal, R. & Fode, K. L.

Expectancy Bias

Expectancy Bias

**EXPERT
DESIGNER**

**NOT A
DESIGNER**

Expectations can change
outcomes.

Our expectations can change
our team's outcomes.

Our expectations can change
our team's outcomes.

Can we use our expectations
to change our team's outcomes
for the better?

Literacy,
Fluency,
& Mastery

THE U.S. DIGITAL SERVICE

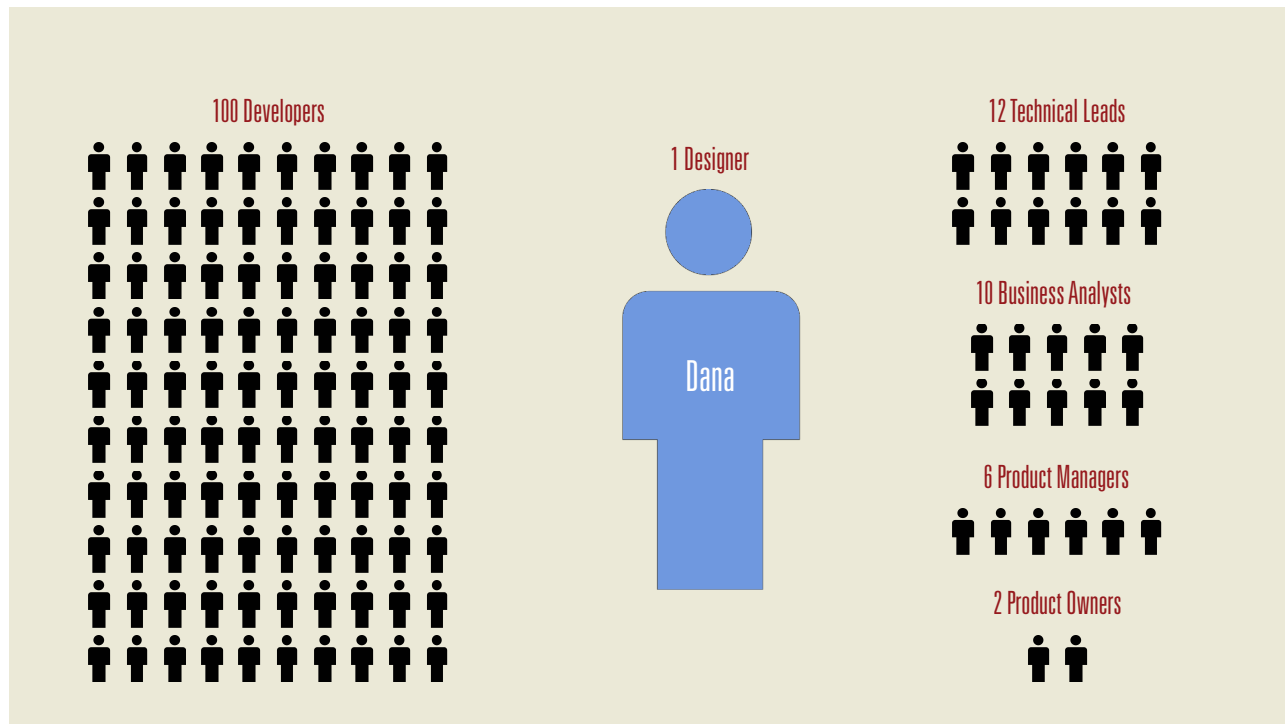

Dana's Project:

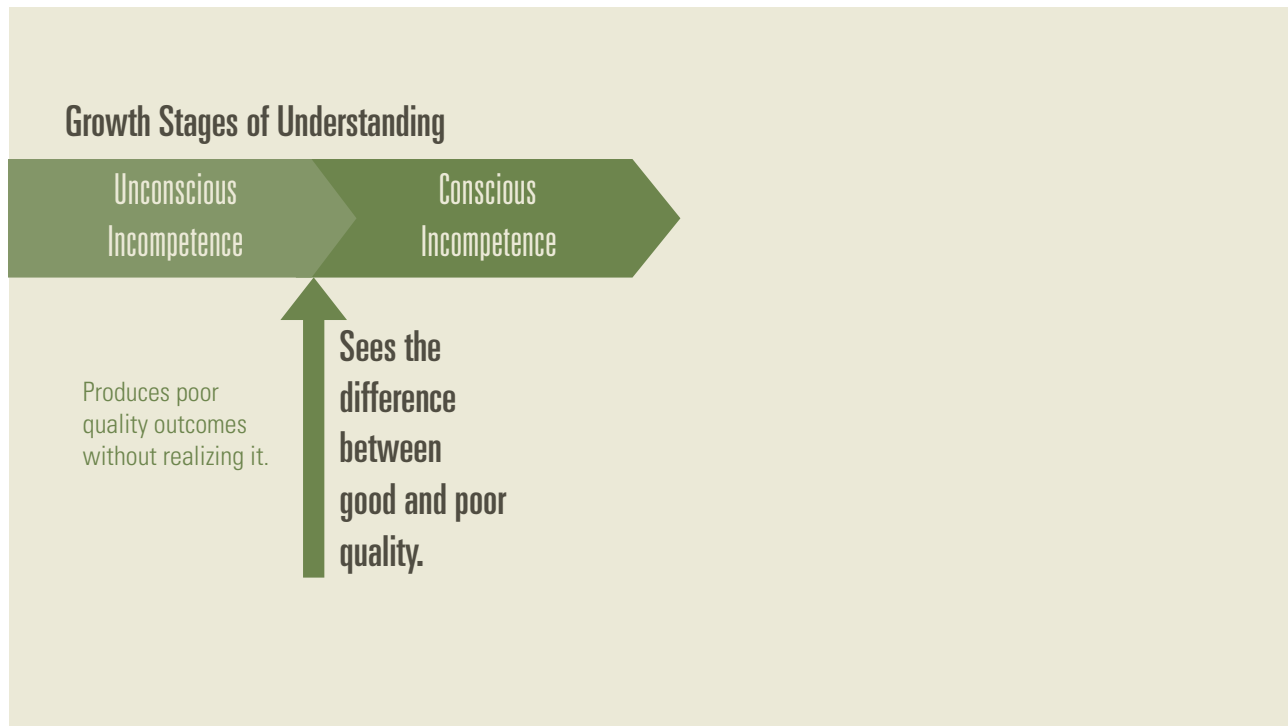

Paper Applications ➔ Online Applications

- ▶ **6,000,000** applications reviewed each year
- ▶ Each application can range from **10** pages to **1,000** pages
- ▶ **3,000** field personnel review applications full time

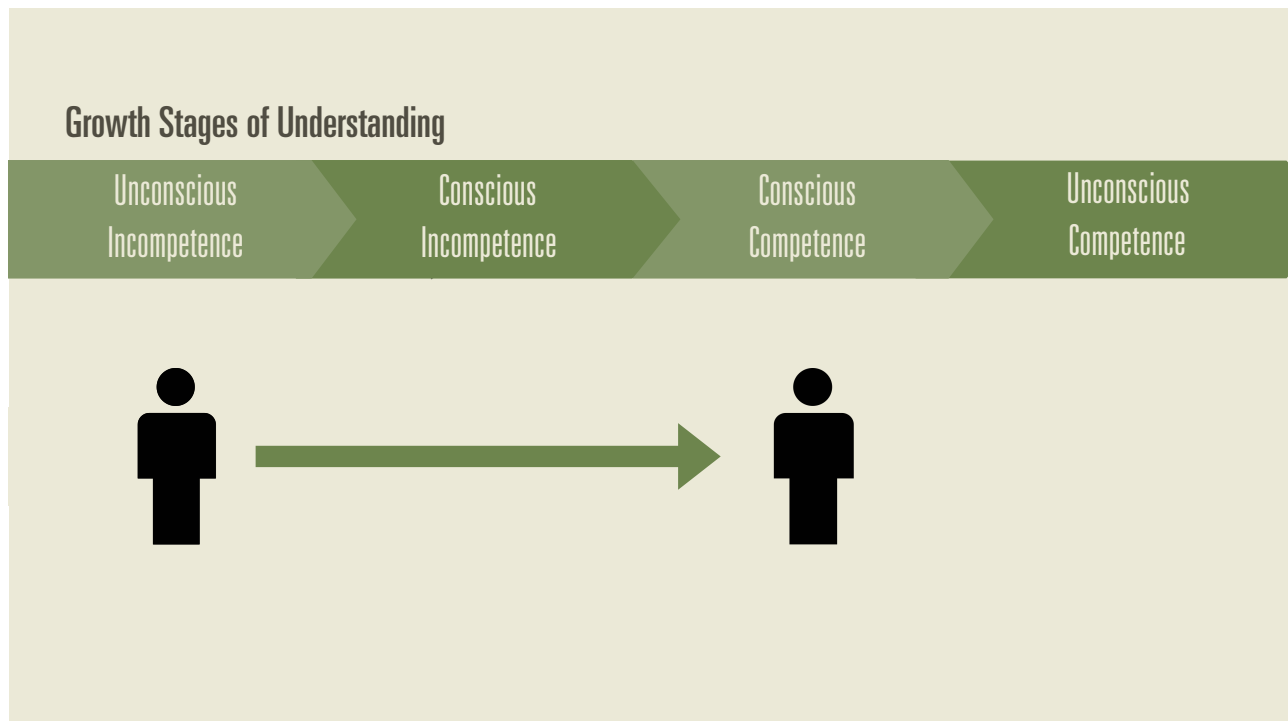

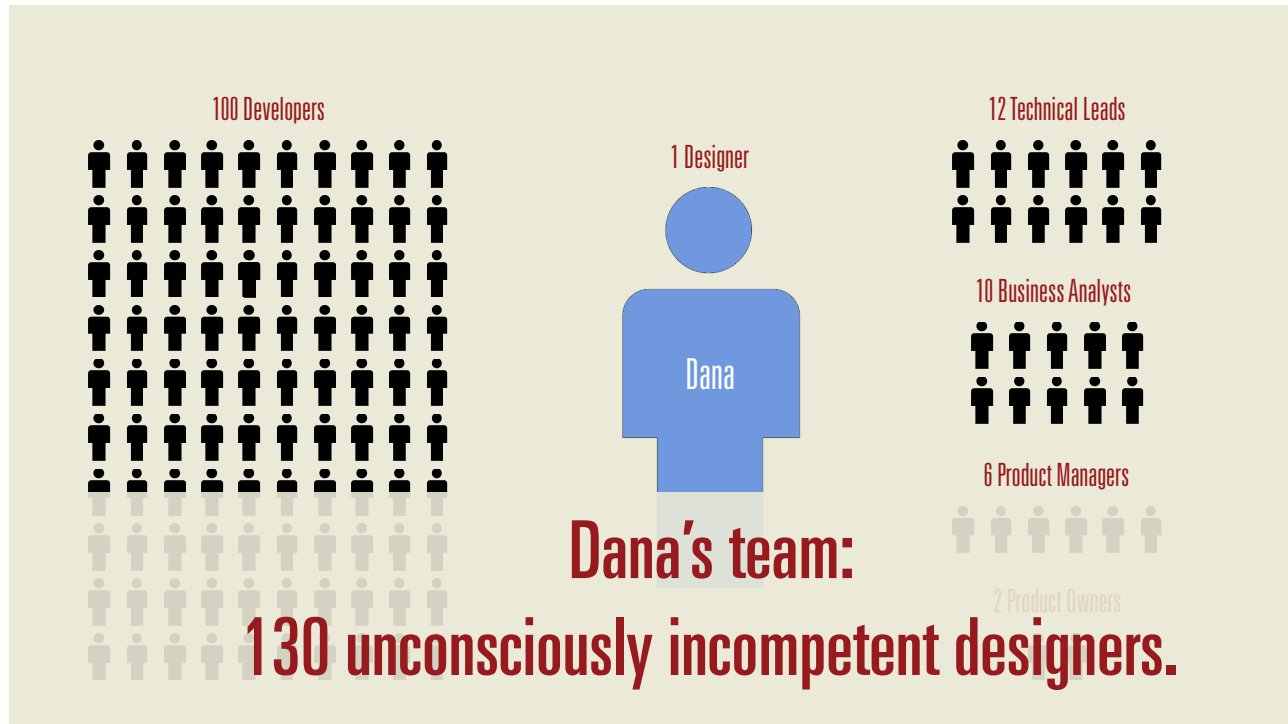

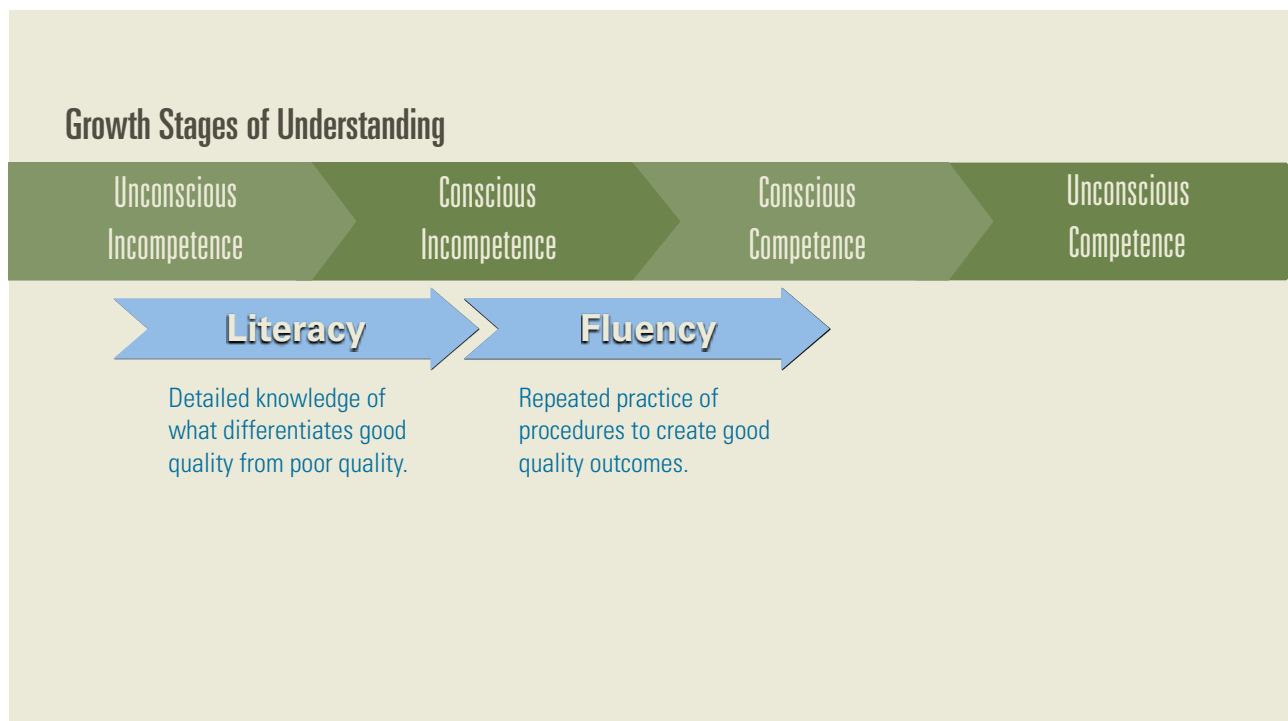

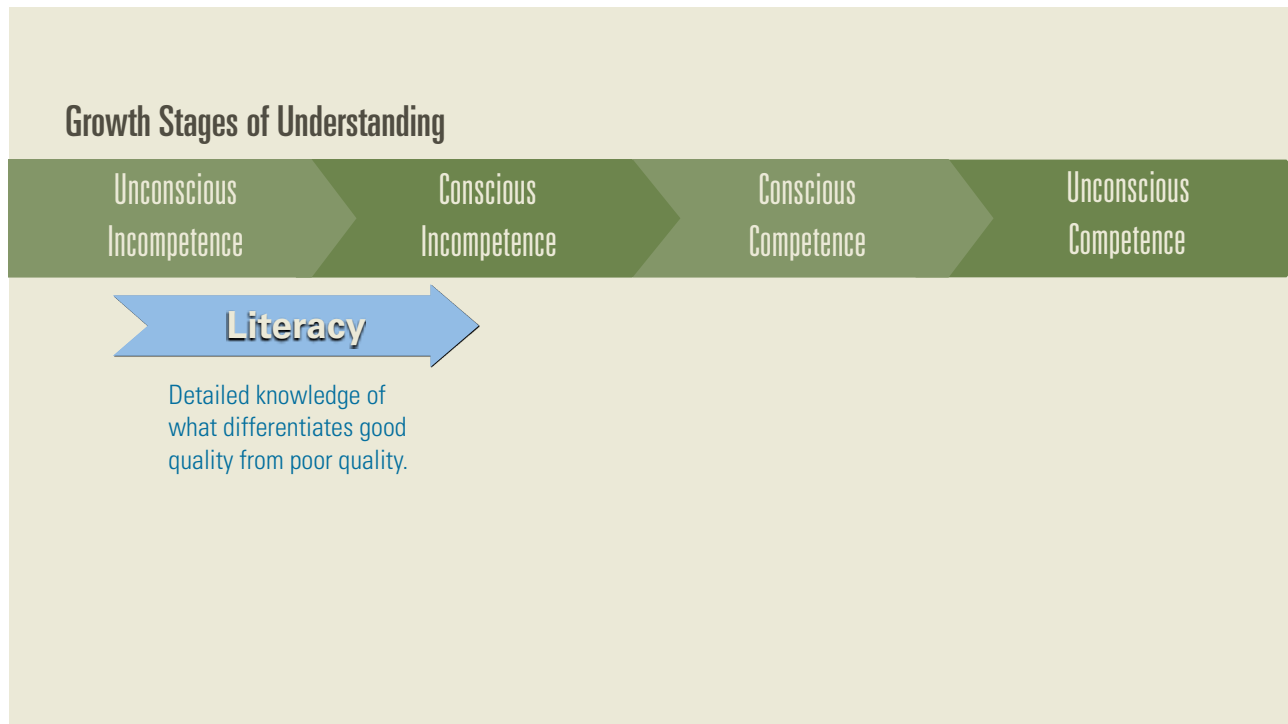

The **design team** consists of **every individual** who **influences** the rendering of our intent.

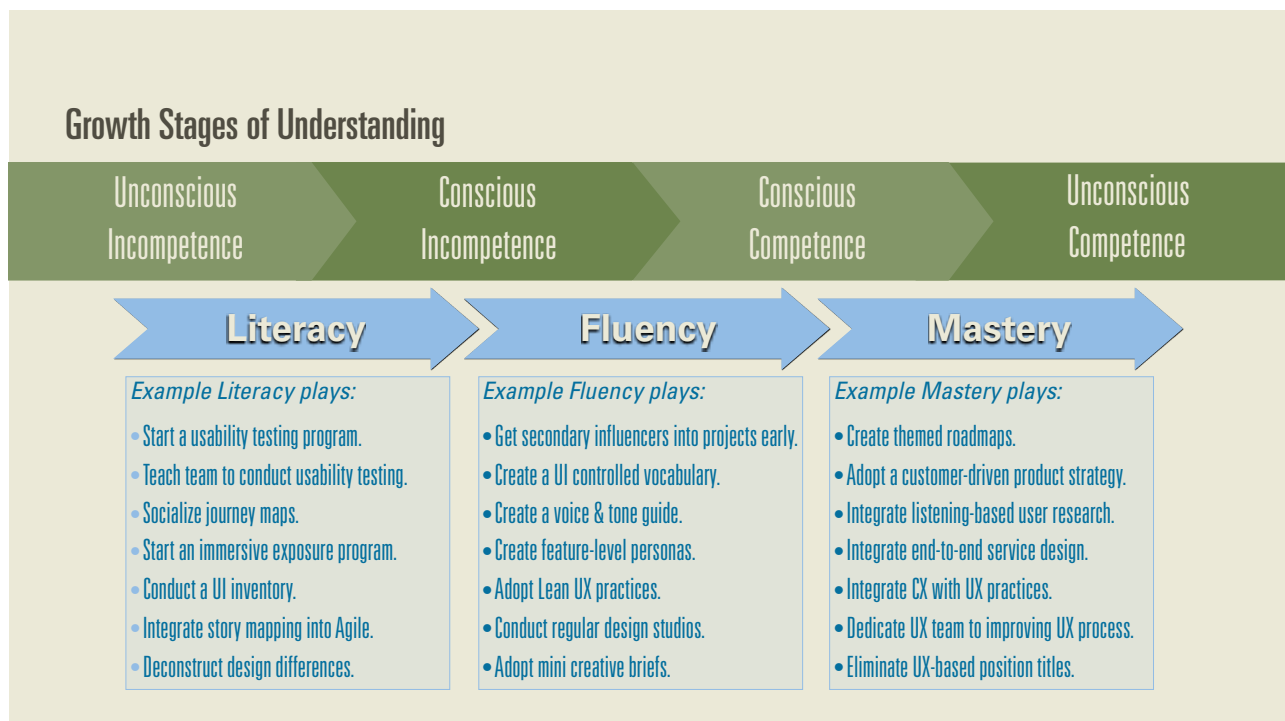

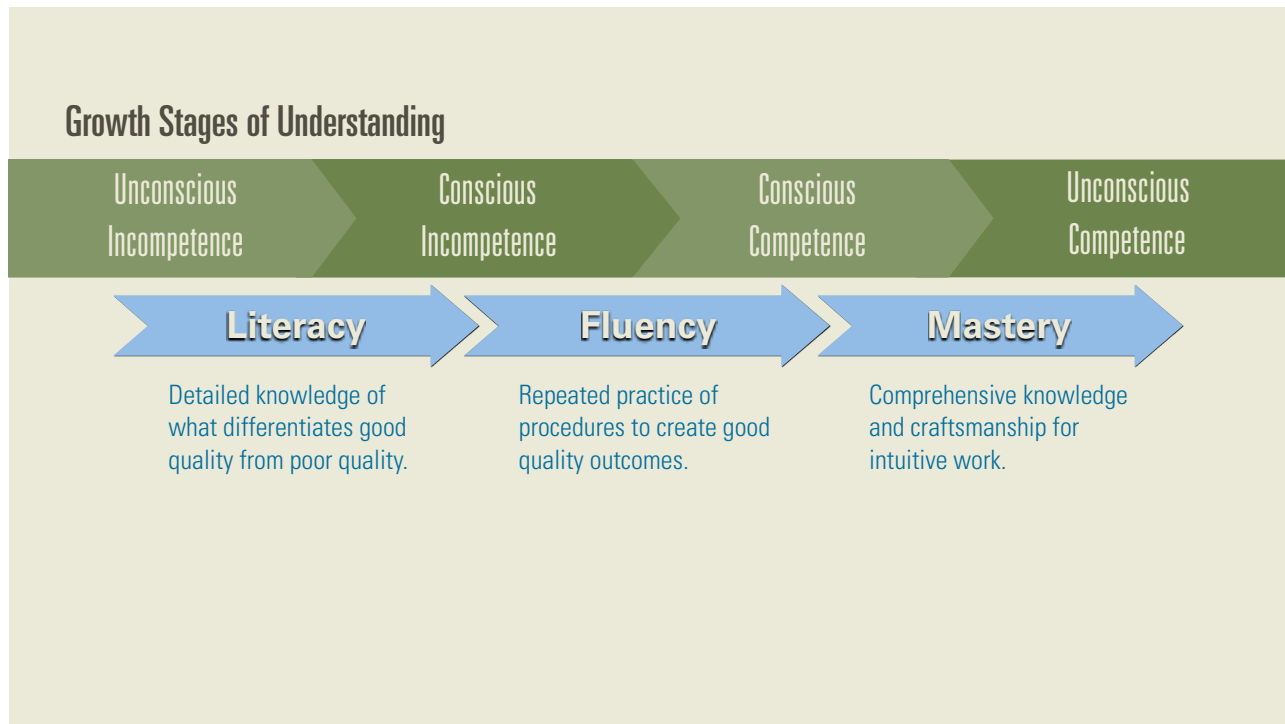

It **no longer** consists only of **trained designers**.

The screenshot displays the SimpliCity web application interface. At the top, the logo "SimpliCity" is accompanied by the tagline "city data simplified" and the Asheville City seal. A navigation bar includes a search field and a "View Topics" menu. The main content area is titled "Crime" and features two dropdown menus: "during" set to "the last year" and "within" set to "a quarter mile". Below these, the address "of 28 SPRUCE DR, 28704." is displayed. A "Map View" section is active, showing a map with a legend for "Burglary" (yellow), "Larceny" (green), "Robbery" (purple), and "Vandalism" (cyan). The map shows several crime incidents plotted near the intersection of Spruce Drive and Spruce Street. A footer at the bottom right of the map area contains the URL "simplicity.ashevillenc.gov".

The mission:
Help every team member
become **consciously
competent.**

**Each come to the table with the expectation
that every team member has design potential.**

**CENTER
CENTRE**  **A 2-year curriculum with team design at its core.**

Embrace *“Everyone thinks they are a designer.”*

Help **every team member** become a better one.

Design is a Team Sport

- ▶ Everyone is a designer.
- ▶ Design processes are a designed experience.
- ▶ Our expectations change their outcomes.
- ▶ Facilitated leadership is a core design skill.
- ▶ Our mission is *conscious competency* for every member of the team.
